

Microsoft 365 Copilot Analytics

Troubleshooting Scenarios

Symptom-first walkthroughs for real issues users report — each with a 30-second diagnosis and causes ranked by likelihood

Document Property	Value
Section	Reference
Audience	All Roles (Admins, Analysts, Support)
Version	1.1

When to use this catalogue

Each scenario starts with the **symptom a user actually reports** — not the underlying feature area — and walks through the most likely causes in priority order with a verification step for each.

- **Use these scenarios** when the symptom spans multiple admin surfaces, or when role / surface confusion is the suspected root cause.
- **Use the Troubleshooting Guide symptom-tables** for quick single-surface lookups (Admin Centre Reports, Copilot Dashboard, Agent Dashboard, Advanced Analytics, Data Upload).

Scenarios

SCENARIO 01

“Upload Org Data” option not visible at
`aka.ms/copilotdashboard`

SCENARIO 02

Who can see the Copilot Dashboard & reports — and why two colleagues differ

Typically reported by: Insights Administrator who expected a CSV-upload button on the Copilot Dashboard.

Surfaces: M365 Admin Center,
`analysis.insights.cloud.microsoft` • 8 causes ranked

Insights Admin

IT Admin

Global Admin

Open scenario →

Typically reported by: A user whose colleague (same team, similar licence) sees nothing — or an admin asking who is *supposed* to see this and how to grant or restrict it.

Surfaces: `analysis.insights.cloud.microsoft`, VFAM,
Entra ID • access-source model + restriction

All Roles

Insights Admin

People-managers
