How This Document Fits

This is a **Reference** guide. Use it to diagnose and resolve issues across the current Copilot Analytics capability areas. For setup instructions, see the Admin Setup Guide.

Section	Purpose	Who Reads
Strategy	Decide what to implement	CIO, SA, Business Leaders
Setup	Configure and deploy	IT Admin, Insights Admin
Operate	Use dashboards and reports daily	Leaders, Analysts, Managers
Reference (you are here)	Look up details and fix issues	Everyone (as needed)

Table of Contents

- 1. Admin Centre Reports
- 2. Copilot Dashboard
- 3. Agent Dashboard

4. Advanced Analytics (Power BI)
5. Data Upload Issues
6. Auditing Delegation
7. Escalation Path

Validate the service before changing the tenant

For a missing page, changed metric, failed export, or sudden data gap, first check Microsoft 365 admin center **Service Health** for active incidents and **Message Center** for rollout, preview, migration, or reporting changes. Record the notice ID, affected cloud, dates, and recovery window. Then confirm the feature is supported in the tenant's exact environment by using Supported Microsoft 365 environments for Viva Insights features (Last updated 30 June 2026). Plan support does not imply feature parity: GCC lacks Agent Dashboard, Copilot metrics export, Copilot Power BI reports, and API/Azure organizational-data imports.

1. Admin Centre Reports

Symptom	Cause
No data displayed	Reports take up to 72 hours to populate after initial licence assignment.
No Copilot licences visible	Licences not purchased or not assigned to users.
Can't export CSV from reports	User does not have the Reports Reader role.
User details hidden / only aggregates visible	Concealed user details is enabled (privacy setting).
0 active users despite assigned licences	Users have not yet interacted with Copilot, or reporting has not caught up

2. Copilot Dashboard

Symptom	Cause
Access denied / cannot open dashboard	The user lacks a qualifying Dashboard access source, is blocked b
Impact page missing collaboration data	Behavioral Experiences is off, optional diagnostic data is disabled
Only Readiness page visible (no Adoption or Impact)	No Copilot licences assigned, or data processing not yet complet
No group filtering available	Organisational data has not been uploaded.
Impact page shows no data	Requires at least 7 days of usage data after licence assignment.
Data suppressed / shows "N/A"	Group is below the minimum group size threshold (default 10).
Managers can't see team data	Manager Settings are not enabled in Viva Insights.
Sentiment section is empty	No Copilot survey has been configured or responses haven't bee
Exclusion list not taking effect	Exclusion list changes take up to 5 days to propagate.
Org data not showing in filters	Wrong attribute names in uploaded CSV or missing EffectiveD
Copilot metrics export missing or disabled	The preview requires the documented 50-licence threshold, glob

3. Agent Dashboard (Preview)

Symptom	Cause
Agent Dashboard not visible	One or more preview prerequisites are missing: conservative 50-Copilot threshold, agent
Agent Dashboard disabled	VFAM policy for AgentDashboard is set to OFF.
No agent data displayed	No agents have been deployed in the tenant, or agents have not been used.

4. Advanced Analytics (Power BI)

Symptom	Cause
Can't access analyst experience	User does not have the Insights Analyst role assigned.
Query returns no data	Analyst's partition does not include the target users.
Query fails with time period error	Selected time period exceeds available historical data.
Power BI won't connect to Viva Insights	Authentication issue — incorrect account or expired token.
No segmentation available in PBI reports	Organisational data has not been uploaded or custom attributes are missing.
Before/after analysis unavailable	No pre-adoption baseline data exists — Copilot was deployed before Viva Ins

5. Data Upload Issues

Validation Failures

These errors occur before data is processed. The upload is rejected and no data is ingested.

Error	Cause
Blank <code>PersonEmail</code> / <code>PersonId</code>	One or more rows have an empty email field.
Missing required attributes	CSV is missing one or more required columns: <code>PersonEmail</code> , <code>ManagerEmail</code>
Empty rows in CSV	Blank rows (including trailing empty rows) cause validation to fail.
Unlicensed apps referenced	CSV references applications or services not licensed in the tenant.
Unsupported custom attributes	Custom attribute names contain spaces, special characters, or exceed 105 t
<code>Microsoft_</code> prefix on custom attributes	Custom attributes must not use the <code>Microsoft_</code> prefix — this is reserved f

Processing Failures

Status	Meaning	Resolution
Processing failed	Backend error during data ingestion.	Retry the upl
Suspended	Credentials expired or backend system unavailable (common with HRIS connectors).	Re-authentic
Partial success	Some rows failed validation (API, Workday, or SAP connectors only).	Download the

Validation Error Reference

For the complete list of upload validation errors and error codes, see [Validation errors for organizational data uploads](#) on Microsoft Learn.

6. Auditing Delegation

Delegation changes are logged in **Microsoft Purview** audit logs. Use these operation names to track delegation activity:

Purview Operation	Description
AddDelegates	A delegate was added to the Copilot Dashboard or Viva Insights.
RemoveDelegates	A delegate was removed from the Copilot Dashboard or Viva Insights.

To view these logs: `compliance.microsoft.com` → Audit → Search → filter by Activities: `AddDelegates` or `RemoveDelegates` → filter by Workload: `Viva Insights` .

7. Escalation Path

If the troubleshooting steps above do not resolve the issue, contact **Microsoft Support**:

1. Navigate to `admin.microsoft.com` → Support → New Service Request
 2. Select **Viva Insights** as the product
 3. Provide the following information:
 - **Tenant ID** (from `admin.microsoft.com` → Settings → Org Settings → Organization Profile)
 - **Licence counts** (total Copilot and Viva Insights licences assigned)
 - **Assigned service-plan counts**, exact cloud, and affected feature/preview
 - **Service Health and Message Center checks**, including notice IDs and dates
 - **Error messages** (screenshot or exact text, including correlation IDs if available)
 - **Steps already taken** from this troubleshooting guide
