

Microsoft 365 Copilot Analytics

Multi-Agency Architecture Decision

Answer three questions to find the right architecture for your tenant

Two architectures exist for deploying Copilot analytics across multiple agencies in a shared M365 tenant: **Default Priority** (agencies see their own data by default, cross-agency visibility is acceptable) and **Isolation** (hard data boundaries via partitions). Answer the questions below to get a recommendation.

[Want the full background? Read why multi-agency analytics is hard →](#)

Question 1 — Must agencies be prevented from seeing each other's data?

No — cross-agency visibility is acceptable

Yes — hard data isolation is required
